Embraer brings new-generation power duo E195-E2 and KC-390 Millennium to the Singapore Airshow

- *Recent sales orders, partnerships and infrastructure expansion reflect Embraer's commitment to the region*
- *Embraer's fleet in APAC spans more than 20 countries*

Singapore – January 26, 2026 – Embraer (NYSE: EMBJ / B3: EMBJ3) today announced its presence at the 10th edition of the Singapore Airshow, taking place from February 3 to 8. The company will display the world's quietest, most fuel-efficient aircraft, the E195-E2, and the versatile multi-mission KC-390 Millennium tactical transport aircraft, which was built and designed in the 21st century.

Embraer's strong presence at the Singapore Airshow demonstrates its commitment to growth in the Asia Pacific region, and celebrates several key milestones in recent years:

- Significant airline momentum for Embraer Commercial Aviation with Scoot operating its full E190-E2 fleet across more destinations in the region since the start of its E2 operations in May 2024; Virgin Australia's first E190-E2 commencing operations in November 2025; and All Nippon Airways (ANA) ordering 15 E190-E2s aircraft with options for an additional five aircraft.
- Embraer Defense & Security signing a Memorandum of Understanding with South Korea's Defense Acquisition Program Administration (DAPA).
- The inauguration of its India office in New Delhi, which adds to the network of offices in Asia Pacific.
- Embraer Defense & Security and Mahindra Group entering a Strategic Cooperation Agreement (SCA) with to advance the C-390 Millennium solution for the Indian Air Force's Medium Transport Aircraft (MTA) program.
- The establishment of Asia Pacific's first E-Jets E2 full flight simulator (FFS) in Singapore by the Embraer-CAE Training Services (ECTS) joint-venture.

These advancements reinforce Embraer's regional commitment and expand its presence across all business units – Commercial Aviation, Defense, Executive Jets, Services & Support.

"The dynamic Asia-Pacific region is a key growth driver for Embraer, and we see significant opportunities across the aerospace and defense sectors," said Francisco Gomes Neto, President and CEO of Embraer. "Airlines in the region increasingly view the E-Jets and E2 as strategic assets for strengthening connectivity across APAC. At the same time, we see strong potential for the KC-390 Millennium as the aircraft continues to gain global traction, demonstrating its multi-mission capability, reliability, and efficiency."

Eve Air Mobility, part of the Embraer group, will also be present at the show. In December 2025, Eve completed the first flight of its uncrewed, full-scale eVTOL prototype at Embraer's test facility, marking the start of its flight-testing campaign and validating the integration of key systems, including the fifth-generation fly-by-wire architecture and fixed-pitch lifter rotors. Test operations will continue throughout 2026, progressively expanding the flight envelope as the aircraft transitions into full wing-borne flight.

Embraer has been in APAC for nearly five decades since the first aircraft operated in the region in 1978. Singapore serves as the hub for Embraer's Asia Pacific operations, including a Regional Distribution Centre that houses over US$100 million in parts, and an E2 simulator that provides essential pilot training for airlines across the region. This in addition to the Company's office in Beijing, China.

Media activities at the Airshow:

- Embraer press conference: Tuesday, 3 February 2026 at 2:00pm in Room 3 at the Singapore Airshow main hall
- Eve Air Mobility Press conference: Wednesday, 4 February 2026 at 1:00pm in Room 4 at the Singapore Airshow main hall
- Media tours of the static display aircraft are planned for 3 to 5 February at 3:30pm; meeting point: Embraer's chalet reception

Timings of Embraer's Press Activities at the Air Show are subject to change. Please contact our on-site press office at embraer_sg@bursonglobal.com to join the mailing list and receive further updates.
